Workflow Details

By clicking the "Details" button, the user can have access to further information, displayed on a modal. This is the list of the available data:

- Workflow name
- The number of projects where the workflow is used

n a Sea	arch Jira admin

			Email This Issue	2	Details	
			Adaptavist ScriptRunner for JIRA		Details	

By clicking the arrow icon on the left of the workflow name, the user will get the following additional information (if clicked, the double-arrow icon on the top-left side of the modal will expand all the arrows at the same time):

- TypeGroup
- Transition
- The number of execution of that transition

s up to date on the	e performan	ce of your JIRA instance: it ar	nalyzes all the Apps insta	lled and their use in w	orkflows and customfields of all p	projects.
